**STRIVING FOR EXCELLENCE**

At Arabian Zinc, "EXCELLENCE" is the buzzword.....  
be it product quality or the services provided to the customer.  
Significant investments in a fully equipped laboratory for Quality Control / R&D as well as adoption of an Integrated Management System stresses our customer-centric focus as well as our commitment towards the environment, health and safety of our people and the society at large.  
All incoming raw materials, in-process as well as finished goods are intelligently evaluated by a dedicated team of qualified chemists for all quality parameters like impurity profile, particle size & distribution, surface area amongst others.

## H.A.K Industrial Chemicals

offers new raw materials at Middle East Coatings Show 2018

# Serving the Middle-East and Africa with our main partners

H.A.K Industrial Chemicals LLC, a member of The Kanoo Group showcased its raw materials for paints, coatings, printing inks and construction chemical industries as agents in the Region for world's leading brands Potters®, Arabian Zinc Oxide Factory®, LKAB®, CABOT®, PERGAN®, and DURA® at the 2018 Middle East Coatings Show held at the Dubai World Trade Centre on March 19-21, 2018.

The Middle East Coatings Show (MECS) is the only dedicated coatings event for raw materials suppliers and equipment manufacturers for the coatings industry in the Middle East and Gulf Region. Mostly those taking part in the trade show are from the GCC, Middle East, parts of Africa and the sub-continent.

During the exhibition, H.A.K Industrial Chemicals LLC displayed various special grades of zinc oxide from its principal, Arabian Zinc Oxide Factory which consistently produces high purity, brightness, refractive index as well as fine particle sizes, through the most efficient method.

They also exhibited LKAB Mineral's range of high-quality mineral solutions with different functionalities used for a variety of coating applications; in addition to the Potters Europe Hollow Spheres in compositions such as Extra-Light & Strong Hollow Glass Microspheres® and Extra-Hard & Fluid-Solid Glass Microspheres, which are functional additives to the paint, coating & ink applications.

Krish Venkatesan, General Manager of H.A.K Industrial Chemicals LLC said, "This year, we are looking forward to new suppliers in the fields of paints, coatings, and construction chemicals. We have just acquired a new supplier of pigments and we are eager to work with them for new marketing initiatives."

"For our existing Principals, we are always exploring new ways to increase our geographical reach, not just in the UAE and Oman. We are already expanding territorially. Nevertheless, we would like to ensure that we have the right principals for our product portfolio to represent our brand image as a market leader in the region for over 20 years," he further said.

Likewise featured in the show are specialty chemicals and performance materials from CABOT, wide range of organic peroxides and azo compounds from PERGAN, and cobalt-free driers, odor elimination additives for water and solvent-based, and water-based specialty polymers from DURA, used for diverse industrial applications.

H.A.K Industrial Chemicals LLC keeps a stock of most of their products in the UAE and supplies them to the majority of their customers in the UAE, Oman, KSA, Bahrain, Qatar, Jordan and Pakistan.

Venkatesan added, "MECS is one of the great platforms to boost our market presence, increase sales & generate leads, and network with the industry's pioneers, manufacturers, suppliers, distributors and key decision makers. We have been actively participating in this event for the last 5 consecutive years and we can see a lot of growth potentials in this sector."
